

Performance™ Series ComfortZone™ II Zoning System

Room-to-room comfort control at your fingertips

ZONECC2KIT, ZONECC4KIT, ZONECC8KIT

More Than a Century of Cool

In 1902, a determined engineer answered one of mankind's most nagging questions: How do we make hot, sticky, indoor air go away? In creating the world's first modern air conditioning system, Willis Carrier forever changed indoor life, and, more than a century later, the corporation that bears his name takes inspiration from his example.

Carrier strives to improve on our founder's breakthroughs, introducing new technologies that make life at home even cooler. Today, our nationwide network of experts continues to advance Willis Carrier's lifework. Your expert Carrier® dealer is equipped to evaluate your home and create a customized system designed around your lifestyle, with products like our Performance™ Series ComfortZone™ II zoning system.

The Carrier® Difference

The Carrier® Performance™ Series ComfortZone™ II system answers the call for delivering comfort, flexibility and customized heating and cooling. Most homes have differing comfort needs in different areas. Warm and cozy in the baby's room...cool and dry in the basement...and varying needs in the kitchen. We put you in control with the ability to set up to eight different temperature settings in one home. Just create your comfort schedule on the main system control then let the individual zone sensors monitor conditions and help direct comfort to areas that need it.

Compare that to a standard system with one thermostat to set the temperature in the whole home. You wouldn't have one switch to control all of your home's lighting, so why not take advantage of the comfort and efficiency benefits of zoned comfort control?

Efficiency

Maximum efficiency is achieved by delivering comfort where and when you need it, and spending less on heating and cooling unoccupied areas. Take it a step further with the ability to set a different comfort schedule in each zone for every day of the week. Our Smart Recovery function then makes sure each zone reaches its scheduled temperature in the most economical way possible.

Customizable Comfort

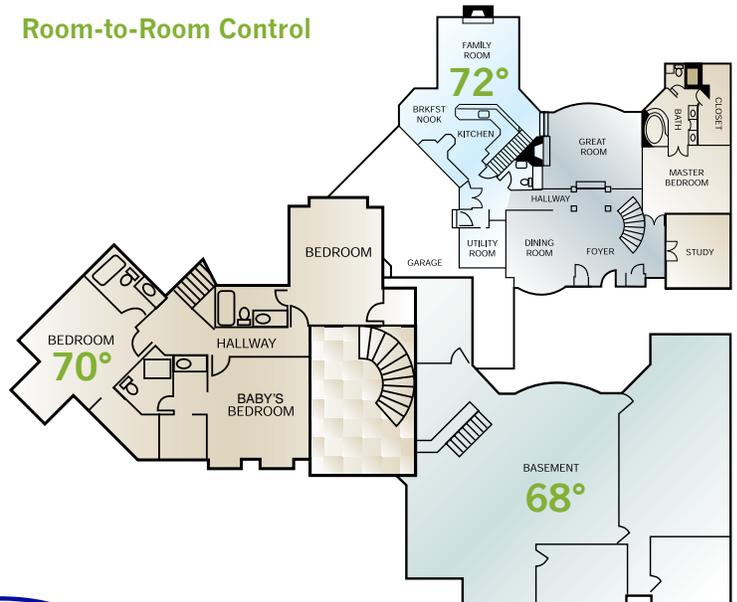

With separate control of up to eight zones, you can reduce hot and cold spots for even, consistent comfort throughout your home. A smart sensor or remote room sensor in each zone monitors individual zone temperatures and allows you to adjust the temperature setting for that zone.

Limited Warranty

To the original owner, the Performance™ Series ComfortZone™ II zoning system is covered by a 10-year parts limited warranty upon timely registration. The limited warranty period is five years if not registered within 90 days of installation. Jurisdictions where warranty benefits cannot be conditioned on registration will receive the registered limited warranty periods. See warranty certificate at carrier.com for complete details and restrictions.
